

Download Free Anatomy Of Reproductive System Exercise 29 Answers

An female's internal reproductive organs are the vagina, uterus, fallopian tubes, cervix, and ovary. External structures include the mons pubis, pudendal cleft, labia majora and minora, vulva, Bartholin's gland, and the clitoris. The female reproductive system contains two main parts: the uterus, which hosts the developing fetus, produces vaginal and uterine secretions, and passes the anatomically male sperm through to the fallopian tubes; and the ovaries, which produce the anatomically ...
