~~Earth Science and the Environment by Graham R. Thompson~~

Environmental Earth sciences is the science that underpins the global Earth system. Combining aspects of geology, oceanography, biology and geography this degree considers how the oceans, atmosphere, biosphere, and geosphere interact to drive environmental change from early Earth history to the modern era. The course also addresses the main challenges facing society from climate change to environmental degradation.

Earth science encompasses four main branches of study, the lithosphere, the hydrosphere, the atmosphere, and the biosphere, each of which is further broken down into more specialized fields. There are both reductionist and holistic approaches to Earth sciences. It is also the study of Earth and its neighbors in space. Some Earth scientists use their knowledge of the planet to locate and develop energy and mineral resources. Others study the impact of human activity on Earth's environment ...
