Part of ESource—Prentice Hall's Engineering Source, this book provides a flexible introduction to graphic concepts. Featuring over 25 modules and growing, the ESource series provides a comprehensive resource of engineering topics. Engineering Graphics; Projections Used in Engineering Graphics; Freehand Sketching; Computer-Aided Design and Drafting; Standard Practice for Engineering Drawings; Tolerances. For any Engineer or Computer Scientist interested in a brief introduction to the subject.

A complete, flexible introductory engineering and computing program. Featuring over 15 modules - and growing - the ESource website allows professors to fully customize their textbooks. Professors can pick and choose modules and sections of modules and incorporate their own materials.

I\*PROMS 2005 is an online web-based conference. It provides a platform for presenting, discussing, and disseminating research results contributed by scientists and industrial practitioners active in the area of intelligent systems and soft computing techniques (such as fuzzy logic, neural networks, evolutionary algorithms, and knowledge-based systems) and their application in different areas of manufacturing. Comprised of 100 peer-reviewed articles, this important resource provides tools to help enterprises achieve goals critical to the future of manufacturing. I\*PROMS is an European Union-funded network that involves 30 partner organizations and more than 130 researchers from universities, research organizations, and corporations. \* State-of-the-art research results \* Leading European researchers and industrial practitioners \* Comprehensive collection of indexed and peer-reviewed articles in book format supported by a user-friendly full-text CD-ROM with search functionality

ESource—Prentice Hall's Engineering Source—provides a complete, flexible introductory engineering and computing program. Featuring over 15 modules and growing, ESource allows users to fully customize their series through the ESource website. Users are not only able to pick and choose modules, but also sections of modules, and re-paginate and re-index the complete project. For any Engineer or Computer Scientist interested in a complete, customized reference.

This book gives readers an overview of engineering as a profession. Collects the very best techniques for succeeding in engineering. Explores skills essential to building on previous knowledge and learning independently. Introduces the engineering profession, discussing what to expect as a real-world engineer. MARKET": "For individuals interested in learning more about the engineering profession.

ESource--Prentice Hall's Engineering Source--provides a complete, flexible introductory engineering and computing program. Featuring over 15 modules and growing, ESource allows users to fully customize their series through the ESource website. Users are not only able to pick and choose modules, but also sections of modules, and re-paginate and re-index the complete project. For any Engineer or Computer Scientist interested in a complete, customized reference.

Part of ESource—Prentice Hall's Engineering Source, this book provides a flexible introduction to Mechanical Engineering. Featuring over 25 modules and growing, the ESource series provides a comprehensive resource of engineering topics. Mechanical Engineering as a Profession; Dimensions, Units, and Error; Statics, Dynamics, and Mechanical Engineering; Mechanical Engineering and Solid Mechanics; Materials and Mechanical Engineering; Fluids and Mechanical Engineering; Thermal Science and Mechanical Engineering; Mechanical Engineering and Design. For any Engineer or Computer Scientist interested in a brief introduction to the subject.

Part of ESource—Prentice Hall's Engineering Source, this book provides a flexible introduction to the use of Word in engineering. Featuring over 25 modules and growing, the ESource series provides a comprehensive resource of essential engineering topics. Covers topics such as formatting documents, using tables in documents, and writing technical documents. For any Engineer or Computer Scientist interested in a brief introduction to Word.
