~~The 12 Best Air Purifiers For Clean Air In Your Home~~

There are two basic types of electrostatic filtration. One is electrostatically charged filter media, and the other is an electrostatic precipitator. Electrostatic media is created by giving a normal filter an electrostatic charge. The electrostatic charge may increase the filter's ability to capture certain particles.

Presents easy-to-accomplish home repairs in question-and-answer format, divided into three sections--exterior, interior, and electromechanicals--covering such topics as plumbing, heating, landscaping, windows, doors, and roofs.

Advances in Smoking of Foods covers the plenary lectures presented at the International Symposium on Advances in Smoking of Foods, held in Warsaw, Poland, on September 8-10, 1976. The book focuses on the processes involved in the smoke curing of foods, as well as on the analysis of the production of smoke and compounds found in it. The compilation first offers information on the phenomena of quality in the smoke curing process, including the history, reviews, and advances of the process. The book then evaluates the physical and chemical processes involved in the production and application of smoke. The processes considered in the production of smoke from wooden materials are underscored. The text

presents an analysis of smoke and smoked food, wherein it is posed that wood smoke is composed of compounds formed by the pyrolysis of wood constituents such as cellulose, hemicellulose, and lignin. Polycyclic hydrocarbons and phenolic compounds are discussed. The book also explains the contributions of smoke compounds to sensory, bacteriostatic, and antioxidative effects in smoked foods; facts and legislation regarding polycyclic aromatic hydrocarbons in smoked foods; and concepts in technology and design of machinery for production and application of smoke in the food industry. The selection is a vital source of information for readers wanting to study the smoke curing of foods.

Presents remedies for physical and emotional problems in cats and dogs

The contributors to this volume deliver information on latest drug treatments and therapeutic approaches for a wide range of diseases and conditions. Coverage includes discussion of racial, ethnic, and gender differences in response to drugs and to biotechnical, pediatric and neonatal therapies.

a water-filtration system, and adjusting home energy using crystals and aromatherapy.

This book gathers the proceedings of the 15th IFToMM World Congress, which was held in Krakow, Poland, from June 30 to July 4, 2019. Having been organized every four years since 1965, the Congress represents the world's largest scientific event on mechanism and machine science (MMS). The contributions cover an extremely diverse range of topics, including biomechanical engineering, computational kinematics, design methodologies, dynamics of machinery, multibody dynamics, gearing and transmissions, history of MMS, linkage and mechanical controls, robotics and mechatronics, micro-mechanisms, reliability of machines and mechanisms, rotor dynamics, standardization of terminology, sustainable energy systems, transportation machinery, tribology and vibration. Selected by means of a rigorous international peer-review process, they highlight numerous exciting advances and ideas that will spur novel research directions and foster new multidisciplinary collaborations.

While heat from sunlight and ventilation from breezes is free for the taking, few modern architects or builders really understand the principles involved. Yet "natural conditioning" -- heating and cooling with passive solar techniques -- is a viable

alternative to fossil fuels. Acknowledging the good intentions of misguided solar designers in the past, the author highlights certain egregious errors and shows how to avoid them. The author shows how to select a cost-effective, energy-efficient, and environmentally friendly backup heating system; how to preserve indoor air quality in an airtight, energy-efficient home; and ways of employing green building materials in a naturally conditioned home.
