Krause Publications' Standard Catalog series is available by specific marque, in individual volumes or a set. Each book contains in-depth profiles of specific makes by model, factory photos, and up-to-date vehicle pricing. The 1-to-conditional pricing system assures readers of accurate values, whether a vehicle is a #1 low-mileage, rust-free beauty or a #6 parts-only heap. "Techs & specs", original factory prices, production and serial numbers, and engine/chassis codes are noted by model, thus helping you determine authenticity accuracy. Historical, technical and pricing information are combined from hundreds of sources. James Flammang values each model according to the popular 1-6 grading system invented by Old Cars magazine.

Seeing is Understanding. The first VISUAL guide to marine diesel systems on recreational boats. Step-by-step instructions in clear, simple drawings explain how to maintain, winterize and recommission all parts of the system - fuel deck fill - engine - batteries - transmission - stern gland - propeller. Book one of a new series. Canadian author is a sailor and marine mechanic cruising aboard his 36-foot steel-hulled Chevrier sloop. Illustrations: 300+ drawings
Pages: 222 pages Published: 2017 Format: softcover Category: Inboards, Gas & Diesel

Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo, Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.

Advanced Materials 1991-1992, I. Source Book focuses on the properties, characteristics, reactions, applications, and composition of ceramics, composites, and plastics. The publication first elaborates on ceramics, including markets, materials, applications, processing, equipment, standards, health, safety, the environment, research initiatives, and industry news. Topics include joint ventures/agreements, powder processing, furnaces, bioceramics, electronics, superconductors, oxide films, silica, sensors, and superconductors. The manuscript also takes a look at composites, as well as markets, materials, applications, processing, non-destructive evaluation, testing, health, safety, and the environment, research initiatives, and industry news. Concerns include restructuring, takeovers and mergers, recycling, health and safety, test development, data generation, manufacturing processes, tooling, coatings, general engineering, aerospace, automotive, and boom in advanced composites. The book then ponders on plastics, including markets, materials, applications, processing, equipment, health, safety, the environment, and industry news. The publication is a valuable reference for readers interested in the properties, applications, processing, and composition of ceramics, composites, and plastics.
