A visual dictionary to the workings of your home, from the editors of Home R magazine. Black and white line drawings clarify every system and structure in the home from Attic ventilation to Zone heating systems, and everything in between from electrical systems to pipes and plumbing to countertops, flooring, and ceiling. A must-have for the do-it-yourselfer.

Playing with S is a resource book for Nursery Practitioners, Teachers, Teaching Assistants, Carers, Speech and language Therapists and Speech and Language Therapy Assistants to use in order to help children to say S in their talking. It contains activities, games and ideas to use with children aged from 3 - 7 years old. It can also be used with older children who have learning difficulties. Each section contains simple, easy-to-follow instructions and practical tips to help support the child. All the materials can be photocopied and instructions are given to help make resources for activities. There are progress sheets in each section to record progress in a fun way. Sample session plans are also included. The resource: Is divided into eleven sections which follow the acquisition of speech sounds in typically developing children; mouth (oro-motor exercises); single speech sound; short words that begin with the speech sound; longer words that begin with the speech sound s; words that end with the speech sound; words that begin or end with s and have more than one syllable; words that have the speech sound s in the middle of the word; opportunities to use all the words presented in the resource in phrases and sentences in a variety of activities and games; instructions and resources for games, which can be played with words from all the sections in the book to provide extra practise; ideas for working on saying s in words and sentences in the nursery, classroom and home; and session plans containing ideas for using this resource with children. There are ideas for making the activities more challenging in the sections and tips on how to make the activities easier, so you can tailor what you are doing to suit each individual child. Age 3-7 302 pp, A4, Wire-0-bound + CD.

This is the first in a series of three volumes dealing with important topics in algebra. It offers an introduction to the foundations of mathematics together with the fundamental algebraic structures, namely groups, rings, fields, and arithmetic. Intended as a text for undergraduate and graduate students of mathematics, it discusses all major topics in algebra with numerous motivating illustrations and exercises to enable readers to acquire a good understanding of the basic algebraic structures, which they can then use to find the exact or the most realistic solutions to their problems.

Field manual 3-90.6 provides the commander and staff of the Brigade Combat Team (BCT) and subordinate units with doctrine relevant to Army and joint operations. It applies to the Heavy Brigade Combat Team (HBCT), the Infantry Brigade Combat Team (IBCT), and the Stryker Brigade Combat Team (SBCT). The doctrine described in this manual applies across the full spectrum of military operations – offense, defense, stability or civil support.

When tragedy strikes and breaks Tony King's home into pieces, he has no choice but to salvage the scraps and move on. Tony, young and impressionable, is ripped from his middle-class upbringings and sent to live with his aunt in the concrete jungle...where young and impressionable just don't last long. In Auntie's neighborhood, the rites of passage apply to any and all. "You take or be taken." In *The Dangerous Times*, Mike Berry examines a young man's quest to find himself or be lost to the streets forever. The code is simple, "Always follow the rules, but break 'em if you have to." "*The Dangerous Times* is a powerful engrossing read with compelling momentum right up to the very end." Oasis, the bestselling author of *Push Comes to Shove & White Heat*

Field Manual FM 3-96 (FM 3-90.6) Brigade Combat Team October 2015 provides doctrine for the brigade combat team (BCT). This publication describes relationships, organizational roles and functions, capabilities and limitations, and responsibilities within the BCT. Tactics, the employment and ordered arrangement of forces in relation to each other (CJCSM 5120.01), are discussed in this manual and are intended to be used as a guide. They are not prescriptive. FM 3-96 applies to the infantry brigade combat team, Stryker brigade combat team, and armored brigade combat team. This publication supersedes FM 3-90.6, Brigade Combat Team. To comprehend the doctrine contained in this publication, readers must first understand the principles of the Army profession and the Army ethic as described in ADP 1, *The Army*. Readers also must understand the principles of war, the nature of unified land operations, and the links between the operational and tactical levels of war described in JP 3-0, *Joint Operations*; ADP 3-0, and ADRP 3-0, *Unified Land Operations*; FM 3-94, *Theater Army, Corps, and Division Operations*, and ATP 3-91, *Division Operations*. In addition, readers should understand the fundamentals of the operations process found in ADP 5-0 and ADRP 5-0, *The Operations Process*, associated with offensive and defensive tasks contained in FM 3-90-1, *Offense and Defense Volume 1*, and reconnaissance, security, and tactical enabling tasks contained in FM 3-90-2, *Reconnaissance Security and Tactical Enabling Tasks, Volume 2*. The reader must comprehend how stability tasks described in ADP 3-07 and ADRP 3-07, *Stability*, carry over and affect offensive and defensive tasks and vice versa. Readers must understand how the operation process fundamentally relates to the Army's design methodology, military decisionmaking process, and troop-leading procedures and the principles of mission command as described in ADP 6-0 and ADRP 6-0, *Mission Command*, and FM 6-0, *Command and Staff Organization and Operations*. The principal audience for FM 3-96 is the commanders, staffs, officers, and noncommissioned officers of the brigade, battalions, and squadron within the BCT. The audience also includes the United States Army Training and Doctrine Command institutions and components, and the United States Army Special Operations Command. This publication serves as an authoritative reference for personnel developing doctrine, materiel and force structure, institutional and unit training, and standard operating procedures for the BCT.

Covering both the fundamentals and applications, *Object Oriented Programming through Java* provides a thorough introduction to this popular programming paradigm. It includes coverage of essential topics such as classes, objects, packages, interfaces, multithreading, AWT, Applets, and Swings. The book also includes a detailed overview of various practical applications, including JDBC, Networking classes, and servlets. It contains exercises at the end of every chapter, and sample illustrative programs are used throughout the book. It is a text for courses on object oriented Java programming and a reference for professionals.

Designed as one of the first true textbooks on how to use the UNIX operating system and suitable for a wide variety of UNIX-based courses, *UNIX and Shell Programming* goes beyond providing a reference of commands to offer a guide to basic commands and shell programming. Forouzan/Gilberg begin by introducing students to basic commands and tools of the powerful UNIX operating system. The authors then present simple scriptwriting concepts, and cover all material required for understanding shells (e.g., Regular Expressions, grep, sed, and awk) before introducing material on the Korn, C, and Bourne shells. Throughout, in-text learning aids encourage active learning and rich visuals support concept presentation. For example, sessions use color so students can easily distinguish user input from computer output. In addition, illustrative figures help student visualize what the command is doing. Each chapter concludes with problems, including lab sessions where students work on the computer and complete sessions step-by-step. This approach has proven to be successful when teaching this material in the classroom.
