BPP Learning Media provides comprehensive materials that highlight the areas to focus on for your exams and complement the syllabus to increase your understanding.

This book examines a wide range of issues that characterize the current IT based innovation trends in organizations. It contains a collection of research papers focusing on themes of growing interest in the field of Information Systems, Organization Studies, Management, Accounting and Engineering. The book offers a multidisciplinary view on Information Systems with the aim of disseminating academic knowledge. It would be particularly relevant to IT practitioners such as information systems managers and IT consultants. The 12 sections cover a broad spectrum of topics including: eServices in Public and Private Sectors; Organizational Change and the Impact of ICT in Public and Private Sectors; Information and Knowledge Management; Human-Computer Interaction; Information Systems, Innovation Transfer, and New Business Models; Business Intelligence Systems, their Strategic Role and Organizational Impacts; New Ways to Work and Interact with the Internet; IS, IT and Security; Blending Design and Behavioral Research in Information Systems; Professional Skills, Certification of Curricula, Online Education and Communities; IS Design; IS Development, Metrics and Compliance; ICT4LAW: Information and communication technologies to help firms, public administrations, legislators and citizens to operate in a highly regulated world. The content of each section is based on a selection of original double-blind peer reviewed contributions.

BPP Learning Media provides comprehensive materials that highlight the areas to focus on for your exams and complement the syllabus to increase your understanding.

Advances in Management Accounting publishes well-developed articles on a variety of current topics in management accounting that are relevant to researchers in both practice and academe. As one of the premier management accounting research journals, AIMA is well poised to meet the needs of management accounting scholars.

An annual prize is awarded for the best paper appearing in Accounting Education: an international journal, and this book contains the prize-winning papers for every year from 1992 to 2012. The journal's primary mission since the first issue was published in March 1992 has been to enhance the educational base of accounting practice, and all the papers in this book relate to that mission. These papers, reporting on research studies undertaken by accounting education scholars from around the world, build on research findings from the broader domain of education scholarship and embrace a wide array of topics – including: curriculum development, pedagogic innovation, improving the quality of learning, and assessing learning outcomes. Of particular interest are three themes, each of which runs through several of the papers: students' approaches to learning and learning style preferences; ethics and moral intensity; and innovation within the accounting curriculum. Accounting educators will find many ideas in the book to help them in enriching their work, and accounting education researchers will be able to identify many points of departure for extending the studies on which the papers report – whether comparatively or longitudinally. This book is a compilation of papers originally published in Accounting Education: an international journal.
