Murder in the Lab by Leonid Heifets Murder in the Lab by Leonid Heifets is a tale of international mystery. Individuals of diverse personalities and backgrounds turn haggard and peeved, owing to the exhausting daily laboratory routine and intrigue. Jealousy, envy, and sexual hookups are not unusual occurrences in this setting. In the span of five months, there have been two deaths. To whom or to what can these deaths be attributed? Could they be the result of infighting among the employees? Are the deaths related to the development of new genetic methods that may transform medicine, with the potential for huge commercial success? The stakes are high-advanced diagnosis and prediction of illnesses before they occur, and above all, life-saving gene therapy. Investigators from the police and FBI must also be on guard for espionage, since the same genetics mastery can be used to develop biological weapons. Two deaths have forced those working in the lab to reexamine their relationships. About the Author Leonid Heifets, M.D., Ph.D., Sc.D., is Professor Emeritus, Department of Medicine, National Jewish Health, in Denver, Colorado. He is a nationally and internationally recognized expert in tuberculosis. After thirty-three years of service at National Jewish Health, in 2012 he retired from his position professor and director of one of the largest TB reference laboratories. Prior to employment at National Jewish, he worked as a physician, epidemiologist, and microbiologist in Russia. He is a recipient of two Lifetime Achievement Awards—one from National Jewish Health Faculty, and the other from the International Union Against Tuberculosis and Lung Diseases. Dr. Heifets has authored more than 200 scientific publications in the fields of epidemiology and microbiology of infectious diseases, and has recently written three books addressed to the general public.

In 1909, as a sadistic killer stalks Manhattan's wealthiest heiresses, Sigmund Freud is called in by American analyst Dr. Stratham Younger to assist him in interviewing Nora Acton, a hysterical survivor of the killer who can recall nothing about the attack. A first novel. Reader's Guide included. Reprint. 100,000 first printing.

Why are all these bodies buried on this Montana mountainside? And who did it? While walking with its owner, a dog unearthed a skull on a popular walking trail in Montana, and that was just the beginning. Just like always, FBI Agent Watson summoned Digger Collins, a forensic anthropologist, to Montana for the bone recovery because Digger is the best. And this case required the best. Digger and FBI Agent Watson have a past, but neither realized the magnitude of their crime scene, yet. After Digger and Watson meet Ellie Masters, another forensic scientist, at a symposium, she jumps at the chance to watch Digger at work. As they recover more bones and identify more victims, the killer becomes agitated. Digger, FBI Agent Watson, and Ellie fight for their lives when the stakes increase, and the killer turns on them. Can they identify the killer before it's too late? OR is the killer too close to stop? BUY NOW to follow Digger's cases from the beginning!

When a floatplane mysteriously explodes above the Alaska wilderness, investigators begin digging into the lives of the five passengers and the pilot. Was the target of the bomb the U.S. senator in the midst of a hotly contended re-election campaign or her husband, a corporate raider with no shortage of enemies? Or could the bomb have been meant for the cannery owner involved in a contentious divorce, or the refuge manager who has a long list of adversaries, including one who has vowed to get even with him. Even the pilot could have been the target, since his girlfriend has violent tendencies and knows how to use explosives. Dr. Jane Marcus is determined to find who murdered her young assistant and the other passengers and the pilot of the floatplane, but when her own life is threatened, she knows she must and the murderer, before she becomes the next victim.

George Bentwood moved to Tennessee from Massachusetts and bought a farm. Because he is gifted in electronics he invents something called the Time Arch. So, he could travel back in time, bye specific items to sell them as antiques in his time. George saves a woman named Cynthia and marries her. Only to find out that all the evidence says that she's a psychotic killer. But there is something about Cynthia that says that she is innocent. After they hire a woman named Ruthie to help them solve the murder. Ruthie tries to use her sexuality to seduce George so she could have the Time Arch for her own research. But becomes romantically involved with some of the men of the past.

The sleepy village of Little Cote was meant to be a quieter pace of life for ex-Met PC Jemima Cotton. But she soon discovers, here a petty rivalry can erupt into full-blown murder . . . Police Officer Jemima Cotton expected Little Cote to be a quieter pace of life. But, unlike London, everyone knows everyone, and beyond the cake sales and coffee mornings, tea parties and village fetes, the neighbours aren't all the best of friends . . . When Jemima is unpacking her mugs and teabags in her new home on Foxglove Close, she's called to attend her first murder investigation. She's excited, until she discovers it's only a few doors down from her. And she hasn't even met her new neighbours yet! As she steps out of her house in full uniform, Jemima can feel the eyes on the back of her neck, and she can see the curtains and blinds twitching. But the crucial question is why did the lonely gentleman at the end of the road get murdered, eating dinner alone at his garden table, tucking into a new bottle of Chablis? As she digs deeper into the murder, Jemima discovers that here in Little Cote, underneath the surface, tensions bubble away . . . and the smallest vendetta can erupt into full blown murder. Perfect for fans of Faith Martin, Helen Cox, Betty Rowlands, and the Midsomer Murders series by Caroline Graham.

The world knows Parisian private investigator Aimée Leduc, heroine of 15 mysteries in this New York Times bestselling series, as a très chic, no-nonsense detective—the toughest and most relentless in the City of Lights. Now, author Cara Black dips back in time to reveal how Aimée first came to inherit Leduc Detective . . . November 1989: Aimée Leduc is in her first year of college at Paris's preeminent medical school. She lives in a 17th-century apartment that overlooks the Seine with her father, who runs the family detective agency. But the week the Berlin Wall crumbles, so does Aimée's life as she knows it. First, someone has sabotaged her lab work, putting her at risk of falling out of the program. Then, she finds out her aristo boyfriend is getting engaged to another woman. And finally, Aimée's father takes off to Berlin on a mysterious errand. He asks Aimée to help out at the detective agency while he's gone—as if she doesn't already have enough to do. But the case Aimée finds herself investigating—a murder linked to a transport truck of Nazi gold that disappeared in the French countryside during the height of World War II—has gotten under her skin. Her heart may not lie in medicine after all—maybe it's time to think harder about the family business.

Scott Davis and Doug Simons were as close as brothers. They were college roommates and baseball teammates, always there for each other. They even ended up marrying sisters, making their brotherhood official as brothers-in-law. They had fame, fortune, beautiful wives, and prospects of long careers in the Major Leagues. Then, in an instant, everything changed. Scott's career with the Red Sox comes to an abrupt halt when he suffers a career-ending injury. He falls back on his law degree, opening his own practice, while Doug continues to play ball for the Padres. Inconceivable tragedy strikes when Doug's teammate Pete is brutally beaten to death in his own condo ... and Doug is the prime suspect. Desperate to defend his friend, Scott takes the case. Secrets and betrayal envelop the investigation as Scott and Doug try to navigate the emotional and legal minefield Pete's murder has created.

OC Back when I was a kid growing up in South Chicago, I never dreamed that having a Lebanese father and a Syrian mother would turn out to be an asset. But my ancestry paid off big-time when I sat down across from Timothy Fisher at a San Francisco sidewalk cafe on that warm September morning. He bought my cover as a Mid-East terrorist!OCohook, line and sinker. Of course, being an FBI agent, IOCOD been provided with excellent cover. Even so, he was nervous and kept looking around at our neighbors, the only ones at the time being a young couple who, hands across their table, were obviously and hopelessly in love. OC IOCOve got the money, OCO I told him, assuming that might help to calm him down. It didn'OCOT. He kept scanning the street. OC IOCOm not interested, OCO he said. And that surprised me. What he said next surprised me even moreOC OCO Over 50! mystery short stories by John Broussard, a prolific and compelling writer. Bosen Books also offers several full length mystery novels by John Broussard. Visit our Fiction page and look under Action, Adventure and Mysteries . A delectable true-crime story of scandal and murder at America's most celebrated university. A delectable true-crime story of scandal and murder at America's most celebrated university. A delectable true-crime story of scandal and murder at America's most celebrated university. On November 23rd of 1849, in the heart of Boston, one of the city's richest men simply vanished. Dr. George Parkman, a Brahmin who owned much of Boston's West End, was last seen that afternoon visiting his alma mater, Harvard Medical School. Police scoured city tenements and the harbor, and offered hefty rewards as leads put the elusive Dr. Parkman at sea or hiding in Manhattan. But one Harvard janitor held a much darker suspicion: that their ruthless benefactor had never left the Medical School building alive. His shocking discoveries in a chemistry professor's laboratory engulfed America in one of its most infamous trials: The Commonwealth of Massachusetts v. John White Webster. A baffing case of red herrings, grave robbery, and dismemberment—of Harvard's greatest doctors investigating one of their own, for a murder hidden in a building full of cadavers—it became a landmark case in the use of medical forensics and the meaning of reasonable doubt. Paul Collins brings nineteenth-century Boston back to life in vivid detail, weaving together newspaper accounts, letters, journals, court transcripts, and memoirs from this groundbreaking case. Rich in characters and evocative in atmosphere, Blood & Ivy explores the fatal entanglement of new science and old money in one of America's greatest murder mysteries.
