Overview Of Ethiopian Investment Policy

IDA's investment in Ethiopia's water supply and sanitation sector has helped the country make significant progress in improving services in the past 10 years. More than 52 million people in Ethiopia now live within 1.5 kilometers of an improved drinking water source compared with only six million people in 1990.

Ethiopia Overview - World Bank

Ethiopia's Agriculture Sector Policy and Investment Framework (2010-2020) External Mid-term Review The MTR was undertaken at the end of the first five years of PIF implementation. The GoE's MoA and partner donors, under the umbrella of REFD&FS, prepared the Terms of Reference (ToRs) for the consultants (Annex 1) to undertake the MTR. 2.

From a war-torn and famine-plagued country at the beginning of the 1990s, Ethiopia is today emerging as one of the fastest-growing economies in Africa. Growth in Ethiopia has surpassed that of every other sub-Saharan country over the past decade and is forecast by the International Monetary Fund to exceed 8 percent over the next two years. The government has set its eyes on transforming the country into a middle-income country by 2025, and into a leading manufacturing hub in Africa. The Oxford Handbook of the Ethiopian Economy studies this country's unique model of development, where the state plays a central role, and where a successful industrialization drive has challenged the long-held erroneous assumption that industrial policy will never work in poor African countries. While much of the volume is focused on post-1991 economic development policy and strategy, the analysis is set against the background of the long history of Ethiopia, and more specifically on the Imperial period that ended in 1974, the socialist development experiment of the Derg regime between 1974 and 1991, and the policies and strategies of the current EPRDF government that assumed power in 1991. Including a range of contributions from both academic and professional standpoints, this volume is a key reference work on the economy of Ethiopia.

The 30th edition of the World Investment Report looks at the prospects for foreign direct investment and international production during and beyond the global crisis triggered by the COVID-19 (coronavirus) pandemic. The Report not only projects the immediate impact of the crisis on investment flows, but also assesses how it could affect a long-term structural transformation of international production. The theme chapter of the Report reviews the evolution of international production networks over the past three decades and examines the configuration of these networks today. It then projects likely course changes for the next decade due to the combined effects of the pandemic and pre-existing megatrends, including the new industrial revolution, the sustainability imperative and the retreat of laissez faire policies. The system of international production underpins the economic growth and development prospects of most countries around the world. Governments worldwide will need to adapt their investment and development strategies to a changing international production landscape. At the request of the UN General Assembly, the Report has added a dedicated section on investment in the Sustainable Development Goals, to review global progress and propose possible courses of action.

This study analyzes the characteristics, motivations, strategies, and needs of FDI from emerging markets. It draws from a survey of investors and potential investors in Brazil, India, South Korea, and South Africa.

This book examines environmental sustainability and inclusive economic growth, providing in-depth analysis of foreign direct investment (FDI) in large-scale agriculture in Ethiopia. In most African states, arable land and other natural resources play a pivotal role for economic growth and development. Ethiopia is one of those countries where agriculture is the backbone of the economy. This sector has also been an attraction for FDI in Sub-Saharan Africa since the global food and financial crisis of 2007 and 2008. This book uses six foreign investments in large-scale agriculture as case studies to examine current Ethiopian policies, the patterns of investment they promote, how these impact on land-based resources and communities' wellbeing. Presenting analyses of the economic, social and political realities of foreign direct investment in the local context, Foreign Direct Investment in Large-Scale Agriculture in Africa discusses how the fundamental principles of pro-poor and environmentally sustainable investments intersect with the government's ambition to advance Ethiopia's development agenda. This book will be of interest to scholars and students of African economics and sustainable development, African policy makers, intergovernmental organisations as well as multilateral and bilateral development partners.

This report presents international investment trends and prospects at global, regional and national levels, as well as the evolution of international production and global value chains. It analyses the latest developments in new policy measures for investment promotion, facilitation and regulation around the world, as well as updates on investment treaties, their reform and investment dispute settlement cases. It provides an overview of industrial policy models for countries at different development levels and the role of investment policies within each model. It analyses the investment policy implications of the new industrial revolution for high-, middle- and low-income countries and offers a toolkit for investment policymakers on how to use investment policies for new industrial development strategies.

This book looks at the evidence and assesses the impact of competition among governments to attract FDI. It finds little evidence directly to support fears of a "global race to the bottom" in labour and environmental standards.

The second volume of EtYIL brings together a number of articles and other contributions that, collectively, take EtYIL's original mission of helping rebalance the narrative of international law another step forward. Like the first volume, this book presents scholarly contributions on cutting-edge issues of international law that are of particular interest to Ethiopia and its sub-region, as well as Africa and developing countries more generally. The major issues tackled include the interplay between national and international in the promotion and regulation of foreign direct investment in Ethiopia; the regulatory framework for the exploitation and development of petroleum resources and relevant arbitral jurisprudence in the field; the role of international law in ensuring the equitable sharing of transboundary resources, such as the waters of the River Nile, or in the delimitation of the continental shelf in the region; the efforts to establish the Continental Free Trade Area in Africa and the lessons that can be learnt from prior experiments; Africa's policy towards the International Criminal Court and the feasibility of alternative means of serving justice in the case of grave crimes; and the UN's peace-keeping operations in their North-South context. The issues addressed in the various contributions are mostly at the heart of live political, diplomatic and judicial activities today, and as such promise to shape the future of international law in the region and beyond. This volume not only takes a significant step further towards EtYIL's mission, but also enriches it with fresh insights from perspectives that are not common in international law scholarship to this day.

The Madrid System for the International Registration of Marks is governed by two treaties: the Madrid Agreement Concerning the International Registration of Marks, which dates from 1891, and the Protocol Relating to the Madrid Agreement, which was adopted in 1989, entered into force on December 1, 1995, and came into operation on April 1, 1996. Common Regulations under the Agreement and Protocol also came into force on that date. The Madrid System is administered by the International Bureau of the World Intellectual Property Organization (WIPO), which maintains the International Register and publishes the WIPO Gazette of International Marks.

The Global Investment Competitiveness Report 2019-2020 provides novel analytical insights, empirical evidence, and actionable recommendations for governments seeking to enhance investor confidence in times of uncertainty. The report's findings and policy recommendations are organized around "3 ICs" - they provide guidance to governments on how to increase investments' contributions to their country's development, enhance investor confidence, and foster their economies' investment competitiveness. The report presents results of a new survey of more than 2,400 business executives representing FDI in 10 large developing countries: Brazil, China, India, Indonesia, Malaysia, Mexico, Nigeria, Thailand, Turkey, and Vietnam. The results show that over half of surveyed foreign businesses have already been adversely affected by policy uncertainty, experiencing a decrease in employment, firm productivity, or investment. Foreign investors report that supporting political environments, stable macroeconomic conditions, and conducive regulatory regimes are their top three investment decision factors. Moreover, the report's new global database of regulatory risk shows that predictability and transparency increase investor confidence and FDI flows. The report also assesses the impact of FDI on poverty, inequality, employment, and firm performance using evidence from various countries. It shows that FDI in developing countries yields benefits to their firms and citizens-including more and better-paid jobs-but governments need to be vigilant about possible adverse consequences on income distribution. The report is organized in 5 chapters: Chapter 1 presents the results of the foreign investor survey. Chapter 2 explores the differential performance and development impact of greenfield FDI, local firms acquired by multinational corporations (i.e. brownfield FDI), and domestically-owned firms using evidence from six countries. Chapter 3 assesses the impact of FDI on poverty, inequality, employment and wages, using case study evidence from Ethiopia, Turkey and Vietnam. Chapter 4 presents a new framework to measure FDI regulatory risk that is linked to specific legal and regulatory measures. Chapter 5 focuses on factors for increasing the effectiveness of investment promotion agencies.
