Algorithms are all around us. In the context of programming, the basic code which returns the average from a list of integers IS an algorithm. function getAverage(list) { int sum = 0, count = list. length; for (var i = 0; i < count; i++) { sum += list [i]; } return sum / count; } Copy.

an algorithm as a program is called programming. In algorithms, steps are expressed in the form of an instruction or statement. As a consequence, a computer program comprises a series of statements which indicate to the computer which operation to perform. The programming language used will dictate the nature of the statements in a program.
