The third
International
Conference on
Composite

Read Book

Section 2

Interfaces (ICCI-III) was held under the auspices of ASM International, The Aluminum Company of America (Alcoa), The Edison Polymer Innovation Co. (EPIC), Case Western Reserve University,

Read Book

Section 2

Nippon Glass
Fiber Co., Nitto
Boseki Co.,
Office of Naval
Reserach (ONR),
SAMPE Japan,
Teijin Co.,
Mobay Co., Union
Carbide Co., and
Vetrotex Sain-
Gobain. The
underlying
philosophy of
the conference

Read Book

Section 2

continues to be the promotion of fundamental understanding of the structure and role of composite interfaces. With the growth of composite interface studies, the research direction

Read Book

Section 2

naturally
changes from
characterization
and

understanding of
interfacial
structure to
controlling this
structure. For
this reason, the
conference was
subtitled,
"Controlled
Interphase

Read Book

Section 2

Structure." The

rather
unfamiliar
phrase

"interphase" is
used to
emphasize the
interfacial
region whose
properties are
different from
the bulk. The
importance of
the interphase

Read Book

Section 2

to the reinforcement
mechanochemical
properties has
been rapidly
recognized among
composite
researchers in
recent years.
The conference
incorporated
nine sessions.
No concurrent
sessions were
planned because

Read Book

Section 2

of the strong
interest among
participants and
organizers to
intennix
researchers from
different
disciplines.
Papers presented
were
redistributed in
Pans I through
V. Because of
this, both the

Read Book

Section 2

Reinforcement and proceedings are not organized based on the traditional disciplines or materials, but rather around concepts.

Toughening
Mechanisms in
Composite
Materials aims

Read Book

Section 2

to provide a comprehensive and technically detailed coverage of composites and their toughening mechanisms.

Unique in its direct and comprehensive approach, the book presents fundamental

Read Book

Section 2

knowledge on composites' toughening mechanisms as well as a comprehensive treatment of numerical methods. This volume summarizes the current state-of-the-art and presents the

Read Book

Section 2

most recent
research
outcomes in the
field. It
details the
development of
each of the
techniques,
beginning with
basic
principles, and
new concepts are
illustrated with
examples
