### Split Air Conditioning System-How to Diagnose and Repair -

Benefits of a Split Air Conditioning System. This kind of air conditioner system has many advantages over traditional A/Cs. One obvious benefit is the quiet performance of a split air conditioner system. The parts of an air conditioner that make the most noise are the compressor and the fan that cools the condenser. In a split system (unlike a window unit), the compressor and fan for the condenser are located outside the room being cooled and therefore the major sources of noise are removed.

The biggest difference between a split air conditioner and a packaged air conditioner is their size. Split air conditioners are typically three times the size of a packaged unit, when you add all of their parts together. That is part of the reason why split air conditioning systems come with two separate pieces – one inside, and one outside.
