Standardized tests demand Standard English, but secondary students (grades 6-12) come to school speaking a variety of dialects and languages, thus creating a conflict between students $\lrcorner$  language of nurture and the expectations of school. The purpose of this text is twofold: to explain and illustrate how language varieties function in the classroom and in students $\lrcorner$  lives and to detail linguistically informed instructional strategies. Through anecdotes from the classroom, lesson plans, and accessible narrative, it introduces theory and clearly builds the bridge to daily classroom practices that respect students $\lrcorner$  language varieties and use those varieties as strengths upon which secondary English teachers can build. The book explains how to teach about language variations and ideologies in the classroom; uses typically taught texts as models for exploring how power, society, and identity interact with language, literature, and students $\lrcorner$  lives; connects the Common Core State Standards to the concepts presented; and offers strategies to teach the sense and structure of Standard English and other language variations, so that all students may add Standard English to their linguistic toolboxes.

"White Monkey" describes an oilman's travels to his ancestral headwaters in Ireland and Britain to investigate the origins of his own beginnings and later to his wife's home in Korea. While on this journey, the author paints a telling portrait of today's oil industry and its interconnection with nations and trade.

The new edition of Kottak's best selling text continues to offer a holistic introduction to anthropology that approaches the course from a four-field perspective. The extensive revision offers many new exciting features that build on the strengths of this approach. A new theme, emphasizing anthropology's integrated and comparative nature, can be found in new Bringing It All Together essays that show how anthropology's sub-fields and dimensions combine to interpret and explain a common topic. A second new theme, Understanding Ourselves, helps to explain the relevance of facts and theories to students. Two new features, Interpreting the World and Atlas Questions, tie in the text with key content from the atlas which is now shrink-wrapped free with every new copy of the book.

Interdisciplinary primary materials for classroom use and student research illuminate the historical and social issues of this controversial American classic.

This book explores terrorism and security issues from feminist perspectives, putting gender and androcentrism at the heart of its analysis. It argues against traditional research approaches to political violence, and terrorism in particular, that are dominated by the  $\llcorner$ male-gaze $\lrcorner$  and individual stereotypes and perspectives, and that feminist approaches offer a fresh perspective on security research. Our current understanding of political violence is primarily based on the experiences of men, and as such, the challenge in terrorism and radicalization research is to demonstrate that women $\lrcorner$ s studies on security and terrorism satisfy certain universal criteria. The author shows how a post-positivist approach can be useful in gaining insights into terrorism and violent extremism, and how to address these phenomena. The book presents theoretical foundations based on various feminist assumptions, and exposes the essence of feminism, its conceptual grid, gender variabilities and the developments in feminist thinking and theory. Furthermore, it discusses the trends in feminist epistemology, and explains female radicalization to terrorist activity, the specificity of female terrorism, and the roles of women in deradicalization processes, as well as their impact on counterterrorism policy. The book concludes that gender difference as a constitutive variable of social reality is of key importance in studies on terrorism and counterterrorism.

Driven by his dream to write and stage an epic stage production of interwoven Chinese novelsWittman Ah Sing, a Chinese-American hippie in the late '60s.
