A Penguin Classics Deluxe Edition of a counterculture classic, and the inspiration for the new Netflix original series Ratched, with a foreword by Chuck Palahniuk Boisterous, ribald, and ultimately shattering, Ken Kesey's 1962 novel has left an indelible mark on the literature of our time. Now in a new deluxe edition with a foreword by Chuck Palahniuk and cover by Joe Sacco, here is the unforgettable story of a mental ward and its inhabitants, especially the tyrannical Big Nurse Ratched and Randle Patrick McMurphy, the brawling, fun-loving new inmate who resolves to oppose her. We see the struggle through the eyes of Chief Bromden, the seemingly mute half-Indian patient who witnesses and understands McMurphy's heroic attempt to do battle with the powers that keep them all imprisoned. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

The World Health Organization's recently published Global Report on Drowning found that drowning is the third leading cause of unintentional injury death worldwide-making the information presented in this new book an important part of the global effort to reduce this health risk. Written by leading researchers and academics from around the world, The Science of Beach Lifeguarding focuses on the scientific evidence that underpins what is taught to and practised by beach lifeguards. It is the first book to pull together all the different areas involved in beach lifeguarding and evaluate their evidence base. An accessible and informative reference underpinned by the best current research, the book's key themes cover the context of beach lifeguarding, the physical environment in which lifeguards work, medical aspects, practical lifeguarding techniques, physiological standards for lifeguards, safety education, and future developments in beach lifeguarding. The book presents groundbreaking work quantifying the scientific rationale behind a universally accepted fitness standard. It supplies an in-depth examination of the risks and hazards associated with the beach environment, including rip currents and cold water immersion. The book includes a state-of-the-art review of drowning and a comprehensive chapter on first aid. Detailing the recently announced 2015 European Resuscitation Council Guidelines, this book is a must-have for beach lifeguards, beach lifeguard

managers, search and rescue personnel, paramedics, sports scientists, health and safety practitioners, and occupational health practitioners.

Wall Street Journal Bestseller New York Times bestselling author Dan Heath explores how to prevent problems before they happen, drawing on insights from hundreds of interviews with unconventional problem solvers. So often in life, we get stuck in a cycle of response. We put out fires. We deal with emergencies. We stay downstream, handling one problem after another, but we never make our way upstream to fix the systems that caused the problems. Cops chase robbers, doctors treat patients with chronic illnesses, and call-center reps address customer complaints. But many crimes, chronic illnesses, and customer complaints are preventable. So why do our efforts skew so heavily toward reaction rather than prevention? *Upstream* probes the psychological forces that push us downstream—including “problem blindness,” which can leave us oblivious to serious problems in our midst. And Heath introduces us to the thinkers who have overcome these obstacles and scored massive victories by switching to an upstream mindset. One online travel website prevented twenty million customer service calls every year by making some simple tweaks to its booking system. A major urban school district cut its dropout rate in half after it figured out that it could predict which students would drop out—as early as the ninth grade. A European nation almost eliminated teenage alcohol and drug abuse by deliberately changing the nation’s culture. And one EMS system accelerated the emergency-response time of its ambulances by using data to predict where 911 calls would emerge—and forward-deploying its ambulances to stand by in those areas. *Upstream* delivers practical solutions for preventing problems rather than reacting to them. How many problems in our lives and in society are we tolerating simply because we’ve forgotten that we can fix them?
