Arthur C. Clarke: The Nine Billion Names of God

"The Nine Billion Names of God" is a 1953 science fiction short story by British writer Arthur C. Clarke. The story was among the stories selected in 1970 by the Science Fiction Writers of America as one of the best science fiction short stories published before the creation of the Nebula Awards. It was reprinted in The Science Fiction Hall of Fame, Volume One, 1929–1964.

The Nine Billion Names of God - Wikipedia

Arthur C. Clarke's The Nine Billion Names of God is an anthology of his favorite short stories that was first published in 1974 during the golden age of mass market science fiction and fantasy. Clarke was one of the giants and the fact that we are still talking about this book now, in the year 2015 is ironic as Clarke was always more of a futurist than a mere sci-fi story teller.

Mir Quasem. Lv 7. 8 years ago. This short story tells of a Tibetan lamasery whose monks seek to list all of the Names of God, since they believe the Universe was created in order to note all the...

What Is Meaning Behind 'The Nine Billion Names of God ...

In Arthur C Clarke's story "The 9 Billion Names of God" the names of God are all possible sequences in an unspecified alphabet, having no more than nine characters, where no letter occurs more than three times in succession. Out of curiosity, I started playing around with determining how many valid sequences there are in a range.

combinatorics - The 9 Billion Names of God - Mathematics ...

In Nine billion names of god a group of monks have been writing down possible names for god for three centuries. They ask for a super computer named the Mark V to be installed at their monastery to speed up the process and request that instead of using number sequences it should use their special alphabet and that no letter must be used more than three time consecutively and should not go over 9 letters.

Nine Billion Names of God Summary/Opinion | yourshiningknight

The Nine Billion Names of God was the first Arthur C Clarke story I ever read, and within a week of reading it I was devouring his work. This story appeals to me on so many levels, but the thing that sticks with me the most is the very last line of the story.

The Nine Billion Names of God by Arthur C. Clarke

The Nine Billion Names of God is another religiously rooted story about monks getting a supercomputer to find all names of God to be ready when he comes. There are some stories about anti-gravity, new worlds, horse like creatures who meet tiny creatures who may outsmart them before too long.

The Nine Billion Names of God (2018) The Nine Billion Names of God. 1957, New York. A Tibetan monk rents an automatic sequence computer. The monks seek to list all of the names of God, and they hire two Westerners to install and program the machine.

The Nine Billion Names of God (2018) - IMDb

Incidentally, nobody has pointed out that at the time Clarke was writing, the British usage of billion was a million million, as opposed to the US meaning of a thousand million. Therefore nine billion would be  $9 \times 10^{12}$ . 86.133.44.50 18:30, 22 October 2018 (UTC) Actually, have you read the story?

90億の神の御名 - Wikipedia

The long and short scales are two of several naming systems for integer powers of ten which use some of the same terms for different magnitudes.. For whole numbers smaller than 1,000,000,000 ( $10^9$ ), such as one thousand or one million, the two scales are identical. For larger numbers, starting with  $10^9$ , the two systems differ. For identical names, the long scale proceeds by powers of one ...

Many of the stories in this collection have appeared previously in various publications.

This volume is of special interest -- included are a wide range of classic stories, including the title story, "Jupiter Five," "The Deep Range," "Second Dawn," and the earliest of the splendidly comic narratives told by Harry Purvis for the benefit of the denizens of the White Hart.

Many of the stories in this collection have appeared previously in various publications.

Six decades of fascinating stories from the legendary “colossus of science fiction” and

creator of *2001: A Space Odyssey* gathered in one compendium (*The New Yorker*). Arthur C. Clarke, along with H. G. Wells, Isaac Asimov, and Robert A. Heinlein, was a definitive voice in twentieth century science fiction. A prophetic thinker, undersea explorer, and “one of the true geniuses of our time,” Clarke not only won the highest science fiction honors, the Nebula and Hugo Awards, but also received nominations for an Academy Award and the Nobel Peace Prize, and was knighted for his services to literature (Ray Bradbury). Now, more than one hundred works of the sci-fi master’s short fiction are available in the “single-author collection of the decade” (Booklist, starred review). This definitive edition includes early work such as “Rescue Party” and “The Lion of Comarre,” classics like “The Nine Billion Names of God” and “The Sentinel” (which was the kernel of the later novel and movie, *2001: A Space Odyssey*), and later works including “A Meeting with Medusa” and “The Hammer of God.” Encapsulating one of the great science fiction careers of all time, this immense volume “displays the author’s fertile imagination and irrepressible enthusiasm for both good storytelling and impeccable science” (*Library Journal*). “One of the most astounding imaginations ever encountered in print.” —*The New York Times* “As his *Collected Stories* helps to demonstrate, there has been no popular writer since the days of C S Lewis and Charles Williams whose disposition is more nakedly apocalyptic, who takes greater pleasure in cradling eternity in the palm of his hand.” —*The Guardian*

Short stories from the science fiction master—including the tale that inspired *2001: A Space Odyssey*. These stories present a brilliant showcase of Arthur C. Clarke’s many-layered approach to the moral dilemmas of scientific advancement—from the thrilling and brutal “Breaking Strain” to the more poetic and thoughtful “Second Dawn.” Also included is “The Sentinel”—the basis for the classic Stanley Kubrick film *2001: A Space Odyssey*. This outstanding collection reminds us that the author of *Childhood’s End* was not only a giant in the world of science fiction, a recipient of multiple Nebula and Hugo Awards, and an incomparable storyteller, but also a “skilled literary artist” (*Hartford Courant*). “I do not know of any short story that has moved me more than Arthur C. Clarke’s ‘If I Forget Thee, Oh Earth.’” —*The Christian Science Monitor*

This ingeniously conceived anthology raises the intriguing question, If Thomas Pynchon's *Gravity's Rainbow* had won the Nebula award in 1973, would the future distinction between literary fiction and science fiction have been erased? Exploring the possibility of an alternate history of speculative fiction, this literary collection reveals that the lines between genres have already been obscured. Don DeLillo's “Human Moments in World War III” follows the strange detachment of two astronauts who are orbiting in a skylab while a third world war rages on earth. “The Ziggurat” by Gene Wolfe traverses a dissolving marriage, a custody dispute, and the visit of time travelers from the future. T. C. Boyle's “Descent of Man” is the subversively funny tale of a man who suspects that his primatologist lover is having an affair with one of her charges. In “Schwarzschild Radius,” Connie Willis draws an allegorical parallel between the horrors of trench warfare and the speculative physics of black holes. Artfully crafted and offering a wealth of esteemed authors—from writers within the genre to those normally associated with mainstream fiction, as well as those with a crossover reputation—this volume aptly demonstrates that great science fiction appears in many guises.

A man discovers the planet’s destiny in the ocean’s depths in this near-future novel by one of the twentieth century’s greatest science fiction authors. In the very near future,

humanity has fully harnessed the sea's immense potential, employing advanced sonar technology to control and harvest untold resources for human consumption. It is a world where gigantic whale herds are tended by submariners and vast plankton farms stave off the threat of hunger. Former space engineer Walter Franklin has been assigned to a submarine patrol. Initially indifferent to his new station, if not bored by his daily routines, Walter soon becomes fascinated by the sea's mysteries. The more his explorations deepen, the more he comes to understand man's true place in nature—and the unique role he will soon play in humanity's future. A lasting testament to Arthur C. Clarke's prescient and powerful imagination, *The Deep Range* is a classic work of science fiction that remains deeply relevant to our times.

The technologically groundbreaking novel of space exploration from the only science fiction author nominated for a Nobel Peace Prize. Roy Malcolm has always been fascinated by space travel. And when he wins a voyage to the Inner Space Station as a game show prize, he's sure it's the trip of a lifetime. Before long, Roy is taken in by the young crew—and shares their adventures and lives. One of Arthur C. Clarke's earliest novels, *Islands in the Sky* is particularly noteworthy for its description of geostationary communications satellites. While this technology was nonexistent during the writing of this book, it later became commonplace—and Clarke is credited with the first practical descriptions of such technology. This book is compelling not just as a fictional tale, but as an example of the prescient power of Clarke's vision. " [Clarke is] one of the truly prophetic figures of the space age. " —The New Yorker

Arthur C Clarke is without question the world's best-known science fiction writer, enjoying a career of unequalled success. Clarke has always been celebrated for his prophetic vision, which is fully on display in this audiobook, but there are also many stories which show his imagination in full flight. This is the fifth and final volume in the collection, and includes some of Clarke's most accomplished work, including *Dog Star*, *The Light of Darkness* and *The Hammer of Gods*.
